PROJECTS

Driver Dispatch Portal

2026

Next.js, TypeScript, React, Convex, Clerk

- Owned end-to-end portal development, from data modeling and backend logic to frontend design.
- Built trip intake, driver offers, delivery records, expenses, and role-based access for agents, drivers, and dispatchers.
- Built AI receipt and booking extraction with validation and user review before saving expenses and appointments.
- Designed workflows around two-plus years of delivery experience; portal is usable and undergoing business testing.

Dispatch Trip Estimator

2026

Next.js, Convex, Clerk, Google Maps, Vitest, GitHub Actions, Vercel

- Built the business's primary trip-estimating tool with Google Maps routing and outbound and return cost calculations.
- Deployed on Vercel and configured GitHub Actions to run type checks and regression tests for cost calculations.

GDKP Raid Ledger

2022 – 2024

Google Apps Script, Google Sheets

- Built an auction and payout ledger tracking hundreds of players across hundreds of raids.
- Imported live roster and character data through Warcraft Logs and Battle.net APIs.

EDUCATION

University of British Columbia

Sept 2025 – present

B.A. Computer Science · third-year standing · Vancouver, BC

Completed CPSC 210: Software Construction
CPSC 213: Introduction to Computer Systems
CPSC 304: Introduction to Relational Databases

In progress CPSC 310: Introduction to Software Engineering
CPSC 320: Intermediate Algorithm Design and Analysis

Vancouver Community College

Sept 2021 – June 2022

University Transfer, Computing Science and Software Systems · Vancouver, BC

- A+ in the programming sequence and data structures (CMPT 1010, 1020, 2225). Transfer GPA 3.43.

EXPERIENCE

Delivery Driver, Dispatch Automotive Delivery

Aug 2021 – Mar 2024

Winnipeg, MB

- Delivered new and used vehicles to dealers and customers across Canada.
- Managed delivery paperwork and communicated with dispatch to coordinate vehicle handoffs and changing schedules.
